Experience

Freelancer

Front End Developer | 03/2024 - Present

- Developed responsive interfaces for e-commerce platforms using React and TypeScript, with a strong focus on user experience.
- Built dynamic views such as product listings, product pages, shopping carts, and checkout processes.
- Integrated REST APIs to manage products, inventory, and transactions.
- Handled global state using Context API and Redux for smooth navigation and performance.
- Applied SEO best practices and optimized page load speed.
- Created interactive features like search filters, form validations, and dynamic UI components.
- Integrated third-party services (payment gateways, shipping APIs, authentication, etc.).
- Collaborated in agile environments using Git for version control.

Education
